Assignment 1:
System Information and Network Testing

Name: Maureen Uzoewulu

Student ID:

Date: May 30, 2026

PART 1 – System Information

Step 1 - Who am I and where am I?

a. Screenshot

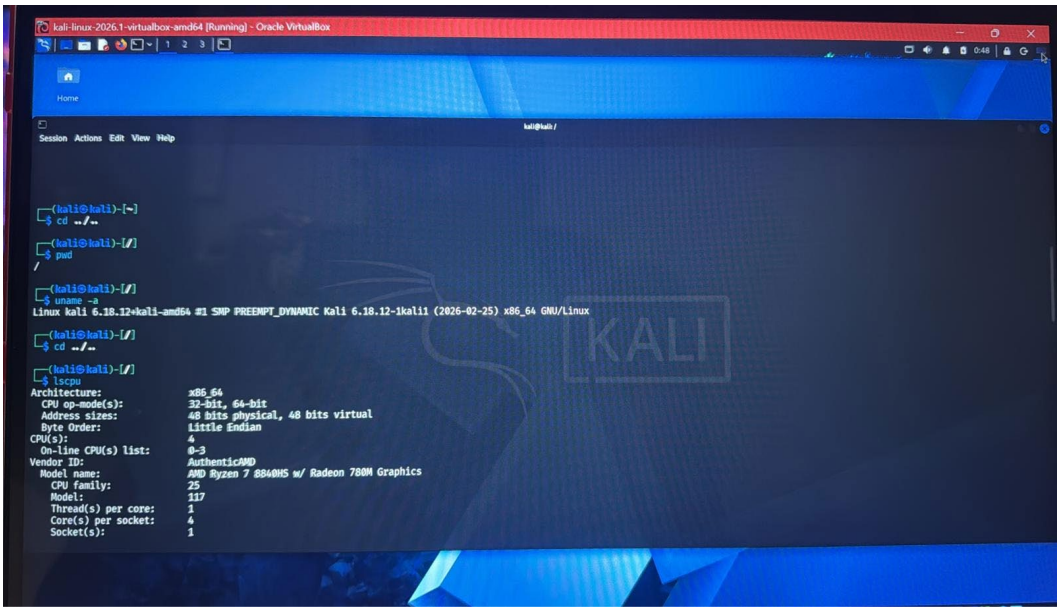

b. Username: ***kali***

Machine's hostname: ***kali***

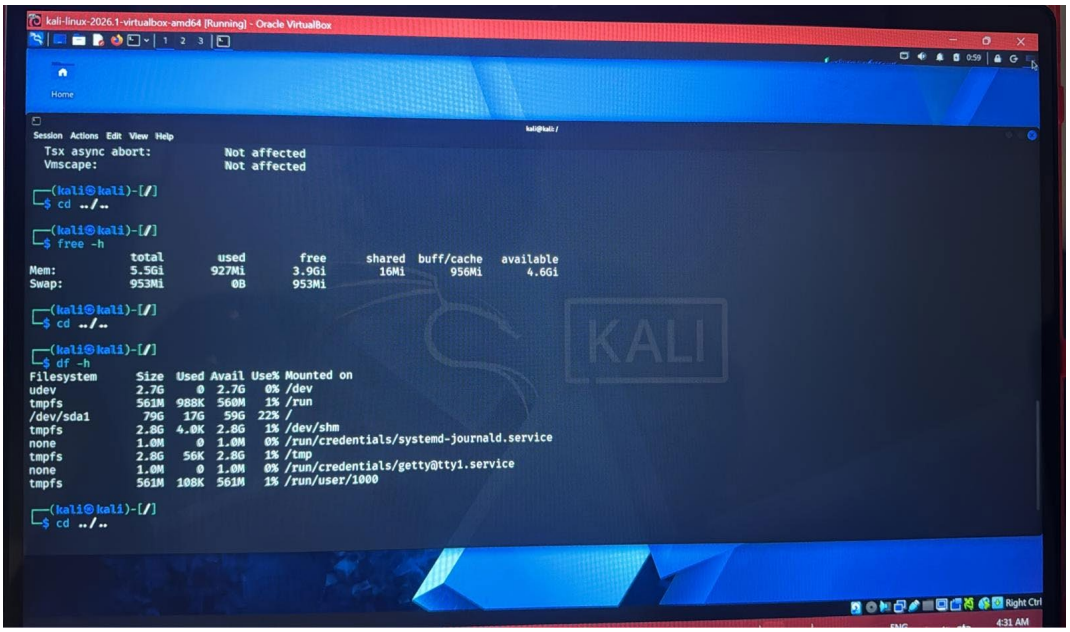

Directory: ***home/kali***

Step 2 – Operating System and Hardware Info

a. Screenshot

b. Screenshot

c. Total RAM: ***5.5Gi***

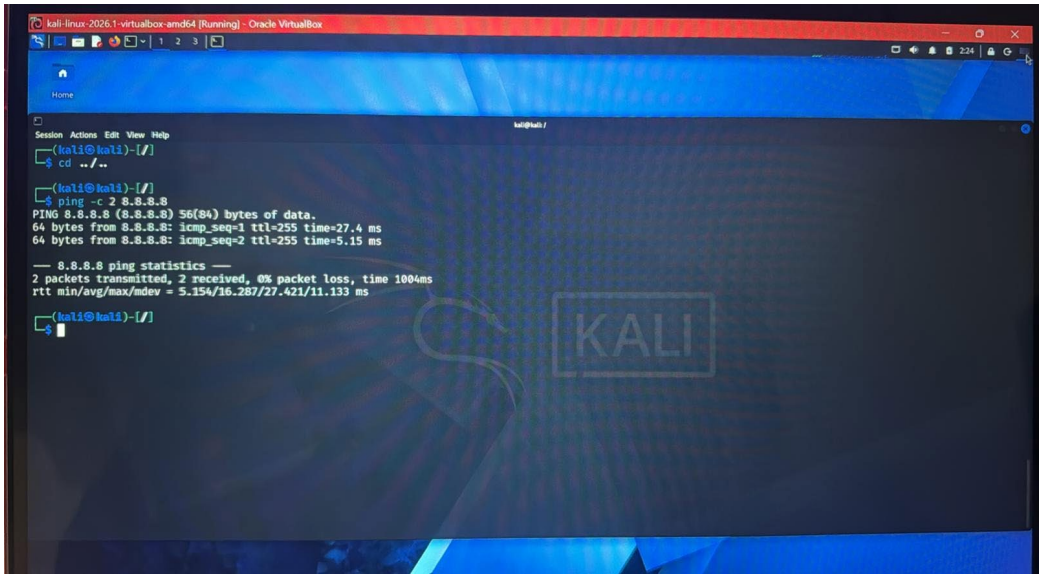

Available disk space: ***4.6Gi***

d. Version: ***Kali 6.18.12***

PART 2 - Basic Network Connectivity Test

Step 1 – Ping a known IP Address

a. Screenshot

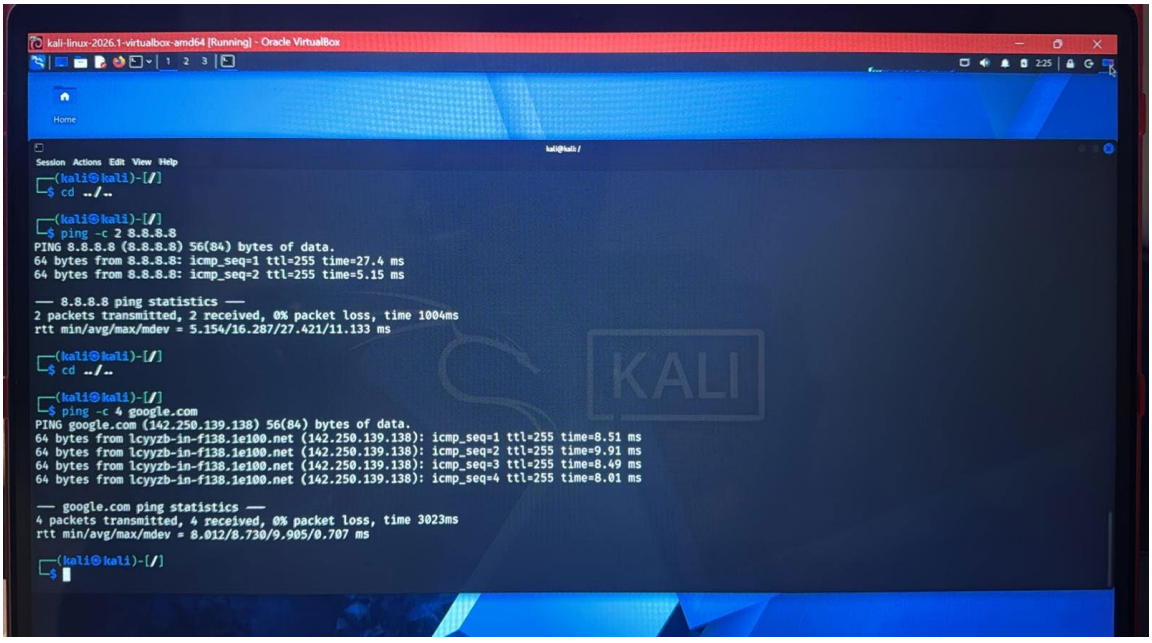

b. Average round-trip time: ***1004ms***

Was there any packet loss? ***No, 0%***

Step 2 – Ping a Domain Name

a. Screenshot

b. IP address that google.com resolved to: ***142.250.139.138***

The Round-trip time is different from pinging 8.8.8.8.

I think it is different because of the number of packets that were transmitted, i.e., -c 2 vs -c 4.

c. -c 4 means that 4 PING requests were sent to google.com
